# Stop Theft!!

## SecureMon™
### Advanced DVR solutions by QTco

- **Remote Monitoring**
- **Competitive pricing**
- **Highest Quality**
- **3yr on-site warranty**

## Statistics show that a visible video surveillance system is the single biggest deterrent for reducing shop theft.

### Now you can throw out your old VCR tapes!

Fully customisable to suit your needs, Securemon™ digital video surveillance and recording systems comprise of a host of features including state-of-the-art video quality and performance, storage, expandibility, upgradeability, ease of use and competitive pricing, fully backed by our national 3 year on-site warranty.

SecureMon™ video surveillance recording systems comprise of a PC, Microsoft ® Windows ® XP and the latest Digital Video Recorder (DVR) technology and offers many features including:

- Remotely view / scan your shop from home
- Advanced motion detection and digital compression
- Expandable video storage capacity
- User-friendly pre-configured software
- Sends an alert to your mobile or to any phone, eliminating costly on going monitoring services
- Remotely controls lights, doors, alarms, in your store from home
- Reduces false alarms, by masking out naturally moving objects e.g. trees
- Images or video clips can be printed or saved to CD system, and used as credible evidence
- Fast search / playback
- Basic model records video outputs from up to 8 cameras. 16 camera option available
- Free on site training

Some of our applications include:

- Retail intelligence - The capabilities provided assist owners in analysing customer traffic flows and conversion rates, and can facilitate store marketing, advertising and promotions.
- POS Integration (POS)
- People Counting
- Number Plate Recognition
- Biometrics

## Up to 3 years onsite warranty

## Single shop

Four cameras, either dome or standard, can be used to monitor most shop environments. Monitoring options include continuous recording or motion detection.
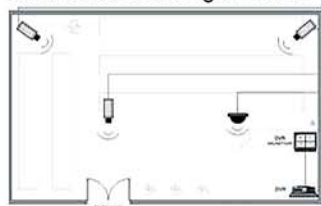

1 x SecureMon™ DVR
1 x 17" CRT monitor
1 x 4 colour camera basic pack
3 year on-site warranty

## Multiple Shops

### See what is really going on in your shops

If you own multiple shops, you can monitor staff and customers remotely from home or the office. You can also have a two-way conversation with people at the remote site via the PC by adding a microphone and speaker in each shop. Connect incident alert buttons, smoke detectors, local alarm.

1 x SecureMon™ DVR
1 x 17" CRT monitor
1 x 4 colour camera basic pack
1 x I/O controller card, speaker & mic
3 year on-site warranty

## Yard/ Warehouse Enviroment

### Zoom into every corner of your premises

Monitor yard or warehouse on-site or remotely from home or office. Alarm can be directed to nominated device (e.g. your phone, PC). Remotely, you can:
· switch on lights.
· scan and zoom around the yard with a Pan/Tilt/Zoom (PTZ) camera.
· talk to the intruder via speaker/ inform him that the police are on their way.

1 x SecureMon™ DVR
1 x 17" CRT monitor
1 x 3 colour camera basic pack
1 x Pan/Tilt/Zoom camera
1 x I/O controller card, speaker & mic
3 year on-site warranty

Wide range of quality cameras (e.g. wireless, IR, 480 TVL) and accessories available

**Record continuously, by motion detection, or by manual alert.**
The motion detect and manual alert (sensor) options offer significant saving on storage space and time spent reviewing.

Any motion or manual alert can be classified as an incident and is time stamped and listed. (For instance, anyone entering the shop or staff pushing a button to record suspicious activity.)

**You can the view each incident by simply double clicking on the time stamped area.**
Depending on how the system is configured, you can playback, say, from 10 seconds before until 30 seconds after an incident. You can freeze, print or save an image or video clip at any point during the playback.

**If you receive an alarm while at home , you can:**
· view the remote cameras live from home
· Remotely switch on lights and even talk to the intruder via loudspeaker
· Scan around the area if you have a PTZ camera installed
  some of these features may require optional extras

**If you are not at home, you can:**
· receive the alert on your mobile/pager
· log into the system and download the incident when you get home
· playback the incident on your home machine at the recorded frame rate

**Includes one week video storage capacity.**
