SecureMon™

Advanced DVR solutions by QT CO

IP Tech

| Remote Monitoring | Competitive pricing | Highest Quality | 3 years onsite warranty |

SecureMon™ IP surveillance solutions offers a future-proof, low entry cost and flexible solution, which can grow as your needs change. Solutions range from a single camera through to solutions, which can have hundreds of cameras spread across the world.

★ Remotely view / scan your premises from anywhere*

★ Sends an alert to your mobile or to any phone, eliminating costly ongoing monitoring services

★ Quick and easy connection (Wireless options)

★ User-friendly pre-configured software

★ From anywhere* remotely control lights, doors, alarms in your store

★ Reduces false alarms by masking out naturally moving objects (e.g. trees)

★ Images or video clips can be printed or saved to disk

★ Advanced motion detection and digital compression

★ Audio connection

★ Recording software – up to 16 camera

★ Bandwidth limitable → minimizing impact on LAN

★ Pan, Tilt – Allows freedom of camera control from anywhere*

★ FREE Onsite training (with complete DVR systems)

* Internet or 3G mobile phone access areas

SecureMon™

Advanced DVR solutions by QT co

## Monitor your premises, kids, parents, pets….

IP Solutions

SecureMon™ Digital Video Recorders (DVRs) and network cameras build the ideal surveillance application and have the best image quality. They can be installed over existing LANs, reducing installation time and costs.

IP Cameras

The SecureMon™ Pan/Tilt (PT) range of cameras (as shown on the front of this brochure) can be remotely viewed or controlled from anywhere*. The only requirement for the site to be monitored is to connect the PT camera to the Internet. Then, from any PC via the Internet (or 3G mobile) anywhere* in the world, the camera footage can be viewed and the camera moved around to get a good look at your premises. The cameras can be mounted on the ceiling or in the middle of the premises to obtain a full 360 view.
